OpenEdge Life Cycle

Progress Software's OpenEdge Product Life Cycle consists of a series of milestones and activities that determine the different stages of a product release's life cycle: starting from its first General Availability (GA) to the eventual Retirement. The Guide posted below will help you understand the different stages of OpenEdge product release life cycle, and plan the upgrade and/or migration strategy for your OpenEdge applications.

Product Life Cycle Policy Guide (Effective: March, 2021) — Frequently Asked Questions

Product Release	Latest Product Update (U)	Life Cycle by Product Release		
		Active	Sunset	Retired
OpenEdge 12.3	-	2020-Oct	N/A	TBD
OpenEdge 12.2 (LTS)	**12.2.5**	**2020-Apr**	**2025-Oct**	**2028-Oct**
OpenEdge 12.1	12.1.0.008	2019-Sep	2020-Apr	2022-Sep
OpenEdge 12.0	-	2019-Mar	2019-Sep	2022-Mar
OpenEdge 11.7 (LTS)	**11.7.10**	**2017-Mar**	**2019-Mar**	**2025-Apr**

(U) Progress only supports the most current Update for a given product release.

(LTS) Long Term Supported product release.

Note: The Active date is when the release (e.g. 11.7.0) was made generally available. There may be any number of subsequent cumulative Updates issued for a release (e.g. 11.7.5), but these do not affect the Active, Sunset and Retirement dates of product releases. Since Updates are cumulative, they become retired immediately upon availability of the following, newer Update. For example, 11.7.6 Update became retired once 11.7.7 Update became available.

NOTICE OF NEW ORACLE JDK RELEASE MODEL AND IMPACTS — Please review changes that Oracle is making to the access of the JDK/JRE effective January 1, 2019.
