Welcome to Progress OpenEdge Release 12.4 Documentation

To launch an OpenEdge manual in Adobe Reader, click the title of the manual.

To search for an expression in the entire OpenEdge documentation set, perform an Advanced Search operation by pressing **SHIFT+CTRL+F**.

When performing an Advanced Search, ensure that the **In the index named oeidx.pdx** radio button is selected in the Search dialog box. If you perform Advanced Search from an OpenEdge manual, keep the **start.pdf** file open to have the **In the index named oeidx.pdx** radio button in the Search dialog box.

OpenEdge

- What's New in OpenEdge 12
- Learn about OpenEdge
- Install OpenEdge 12
- Upgrade to OpenEdge 12
- Startup Command and Parameter Reference
- Frequently Asked Questions

ABL

- Develop ABL Applications
- Basic ABL Guided Journey
- ABL Reference
- ProDataSets Guided Journey
- Use ProDataSets
- ABL Error Handling

ABL

- Troubleshoot ABL Applications
- OpenEdge Programming Interfaces
- Manage ABL Applications
- Develop WebClient Applications
- Use XML with ABL Applications
- Use JSON with ABL Applications
- Use ABL Database Triggers and Indexes
- Use Dynamic Call Objects in ABL Applications
- Develop Portable ABL Applications
- Internationalize Applications
- ABL Data Types Reference

Clients

- Learn about Open Clients
- Develop .NET Open Clients
- Develop Java Open Clients
- Develop an HTTP Client
- Develop an ABL SOAP Client

Database

- Database Essentials
- Start up and shut down a Database
- Database Tools
- Database Administration Tools
- Manage the OpenEdge Database
- Learn About OpenEdge Database Docker Container Images
- Introduction to Change Data Capture

Database

- Introduction to Database Multitenancy
- Introduction to Database Table Partitioning
- Manage Extents of a Database
- Database Replication Quick Start
- Use Database Replication
- Improve the Performance of the OpenEdge Database
- Optimize the OpenEdge Database for Continuous Operation
- Introduction to Threaded Database Server
- Replication AI Streaming

DataServers

- Use the Microsoft SQL DataServer
- Use the Oracle DataServer

OpenEdge DevOps

OpenEdge DevOps Framework

GUI for .NET

Introduction to GUI for .NET Objects

Use GUI for .NET in ABL Applications

GUI for .NET to ABL Mapping Reference

Introduction to the OpenEdge Visual Designer

Messaging

Use the OpenEdge JMS Adapter

Use the OpenEdge Adapter for Sonic ESB

Object-oriented ABL

Object-oriented ABL Guided Journey

Develop Object-oriented ABL Applications

OpenEdge Command Center

Install the OpenEdge Command Center

Use the OpenEdge Command Center

OpenEdge Management

Introduction to OpenEdge Management

Manage Database Table Partitioning

Manage Database Change Data Capture

Get started with Database Multitenancy

Configure Database Multitenancy

Configure OpenEdge Components

Manage PAS for OpenEdge with OpenEdge Management

Use OpenEdge Management Alerts

Manage the OpenEdge Database

Monitor OpenEdge Resources

Use OpenEdge Management Reporting

OpenEdge Management

Use the OpenEdge Trend Database

Manage Servers, DataServers, Messengers, and Adapters

Pro2

Use Pro2

Pro2 Web User Interface Reference

PAS for OpenEdge

Learn About PAS for OpenEdge

Manage PAS for OpenEdge

Application Development with PAS for OpenEdge

Migrate Classic AppServer Applications to PAS for OpenEdge

Run PAS for OpenEdge in a Docker Container

Unified Logging for PAS for OpenEdge

PAS for OpenEdge

PAS for OpenEdge Administration Tools Reference

Use Swagger UI

Progress Data Objects

Develop Progress Data Objects

Progress Data Objects Reference

Security

Manage OpenEdge Keys and Certificates

Introduction to the OpenEdge Authentication Gateway

Introduction to Identity Management

Introduction to Security and Auditing

Learn About Security Domains

Services

Develop ABL Services
