Learn about Corticon Tutorials

Corticon tutorials include:

- **Basic Rule Modeling**—An introduction to business rule modeling in Corticon Studio.
See *Tutorial: Basic Rule Modeling*.
- **Advanced Rule Modeling**—Builds on what you learned in the Basic Tutorial. In this tutorial, you will learn how to use some of Corticon Studio's more complex and powerful functions. See *Tutorial: Advanced Rule Modeling in Corticon Studio*.
- **Rules that access a Database**—Learn how to model rules that read, add, update, and delete data from a database. See *Tutorial - Modeling Progress Corticon Rules to Access a Database using EDC*.
- **Decision Services that access a Database**—Learn how to create a database schema, or map to an existing schema to create rules, and then deploy a decision service. See *Tutorial - Connecting a Progress Corticon Decision Service to a Database using EDC*.
- **Deploy as a Java Web Service**—Deploy a Ruleflow from Corticon Studio to Corticon Server. See *Tutorial - Deploying a Progress Corticon Decision Service as a Web Service for Java*.
- **Deploy as a Java in-process Server**—Learn how to deploy and access a Decision Service in-process from a Java client. Uses Corticon Studio for Java programming. See *Tutorial - Deploying a Progress Corticon Decision Service in Process for Java*.
