Welcome to Progress OpenEdge Release 12.0 Documentation

To launch an OpenEdge manual in Adobe Reader, click the title of the manual.

To search for an expression in the entire OpenEdge documentation set, perform an Advanced Search operation by pressing **SHIFT+CTRL+F**.

When performing an Advanced Search, ensure that the **In the index named oeidx.pdx** radio button is selected in the Search dialog box. If you perform Advanced Search from an OpenEdge manual, keep the **start.pdf** file open to have the **In the index named oeidx.pdx** radio button in the Search dialog box.

OpenEdge

- Learn about OpenEdge
- What's New in OpenEdge 12
- Install OpenEdge 12
- Upgrade to OpenEdge 12
- Startup Command and Parameter Reference

ABL

- Develop ABL Applications
- ABL Reference
- Use ProDataSets
