

## Pro2 - Upgrade Pro2 6.0 to version 6.0.1

Note: In this guide, all documentation references point to the root level of your existing Pro2 version 6.0 installation. For this example, all {Pro2} references should be translated to c:\6xp2.

Prerequisites for this upgrade are;

1. A working/running copy of Pro2 version 6.0.
2. Download 6.0.1 from ESD
  - a. You should have Pro2v6.0.1.bin, Pro2v6.0.1.exe and **Pro2v6.0.1.zip**  
**For this upgrade we'll be only need Pro2v6.0.1.zip.**

Note: In this guide, all documentation references point to the root level of your existing Pro2 version 6.0 installation. For this example, all {Pro2} references should be translated to c:\6xp2.

1. **Run GetSupportInfo.bat to gather installation specifics**
  - a. Run {Pro2}\bprepl\Scripts\GetSupportInfo.bat
  - b. Copy the output information and store it in a safe location.
2. **Stop all threads**
  - a. Open the Pro2 version 6.0 webapp and stop any existing threads (Replication, CDC and/or Job threads)
3. **Create a backup folder and backup your existing copy of {Pro2}\bprepl**
  - a. Create directory {Pro2}\backup
  - b. Copy {Pro2}\bprepl to {Pro2}\backup
  - c. Version 6.0 does not utilize the new {Pro2}\PASOE folder. However, if this folder exists then also backup/copy this folder to {Pro2}\backup.
4. **Extract the new code from Pro2v6.0.1.zip**
  - a. Into a temporary folder, extract all files from Pro2v6.0.1.zip. This folder will be referenced as {ExtractDir}
5. **Install the new 6.0.1 bprepl code**
  - a. Copy everything from {ExtractDir}\bprepl to {Pro2}\bprepl **excluding {ExtractDir}\bprepl \Scripts folder.**
6. **Install the new PASOE folder**

- a. Copy {ExtractDir}\PASOE to {Pro2}\PASOE
- 7. Install the new Pro2v6\_Web\_install.bat**
  - a. Copy {ExtractDir}\bprepl\Scripts\Pro2v6\_Web\_install.bat to {Pro2}\bprepl\Scripts.  
Answer "YES" if prompted to overlay the existing version.
- 8. Upgrade the Pro2 Web Application to 6.0.1**
  - a. Run {Pro2}\bprepl\Scripts\Pro2v6\_Web\_install.bat
- 9. Restart Tomcat and the upgrade is complete**
- 10. Restart any threads stopped in step #2**
