Product version: Progress OpenEdge Pro2 6.4

Preface

Purpose

Audience

Organization

Documentation conventions

See [Documentation Conventions](#) for an explanation of the terminology, format, and typographical conventions used throughout the OpenEdge content library.

Issues fixed in Pro2 6.4

Issue Number	Description
OCTA-43766	CDC admin log file gets closed after AsReplProc - AS connect fail. Logging no longer continues, however the thread continues to process properly.

Issues fixed in Pro2 6.3

Issue Number	Description
OCTA-42908	Pro2 6.2.3 Generate Target Schema functionality does not generate SQL commands for tables having a table name beginning with Repl
OCTA-42873	Characters such as é are not saved in the stored odbc password in the file C:\Pro2\bp\prep\Scripts\mfg.pf when using the pro2 6.2.3 web interface link: https://localhost:9992/pro2/sidebanding/replication/settarget
OCTA-42248	Adding a source db using the pro2 6.2.3 web interface generates a .pf file having a -db entry using the logical db name instead of the physical db name
OCTA-42169	There is no method to stop Pro2 processes based on a schedule on Pro2 6.x
OCTA-39932	Code generated for the bulk load of a table in Pro2 6.2 does not compile.
OCTA-38990	Pro2 CDC fails with Value too large to fit in INTEGER (15747) and (2570)
OCTA-38429	For some files prefix \{&ReplDB} is missing.
OCTA-38266	Pro2_env.sh doesn't include the custom folder in the propath to pick the custom files
OCTA-37418	In Pro2 WAN setup PASOE has memory leaks, several agents consuming gigs of memory.
OCTA-36693	Data discrepancy issues were found in multiple Pro2 operations.
OCTA-35811	There should be an easier way to select multiple tables in the Advanced Configuration page when assigning threads in v6.x.
OCTA-35488	When source databases are CDC enabled during 1st Pass is LAN, no issues are reported but when 2nd PASS is WAN and set ENABLE_OE_CDC YES in predefs.i, get an error when starting Admin tool "DB version is < v11" which is not informative.

Issue Number	Description
OCTA-35043	EXCEPT_TGT_FIELDS property is still there but has been omitted from the Pro2 templates.

Issues fixed in Pro2 6.2.3
